

## Scoring Sheet for the CORE Assessment of Psychomotor Change

After entering the item ratings in the boxes sum the columns to obtain the scores on the three scales; then sum the three scale scores to obtain the total score.

1. Non-interactiveness . . . . .	<input type="text"/>			
2. Facial immobility . . . . .		<input type="text"/>		
3. Postural slumping . . . . .		<input type="text"/>		
4. Non-reactivity . . . . .	<input type="text"/>			
5. Facial apprehension . . . . .				<input type="text"/>
6. Delay in responding verbally . . . . .		<input type="text"/>		
7. Length of verbal responses . . . . .	<input type="text"/>			
8. Inattentiveness . . . . .	<input type="text"/>			
9. Facial agitation . . . . .				<input type="text"/>
10. Body immobility (amount, not speed) . . . . .		<input type="text"/>		
11. Motor agitation . . . . .				<input type="text"/>
12. Poverty of associations . . . . .	<input type="text"/>			
13. Slowed movement (speed, not amount) . . . . .		<input type="text"/>		
14. Verbal stereotypy . . . . .				<input type="text"/>
15. Delay in motor activity . . . . .		<input type="text"/>		
16. Impaired spontaneity of talk . . . . .	<input type="text"/>			
17. Slowing of speech rate . . . . .		<input type="text"/>		
18. Stereotyped movements . . . . .				<input type="text"/>
NI = Non-interactiveness RT = Retardation AG = Agitation				
	<input type="text"/>	<input type="text"/>	<input type="text"/>	
	NI	RT	AG	

Total CORE score = NI + RT + AG =
