

Depression Module: The Psychological Treatment Team: GP, Psychologists and Others...

Duration	3 hours
Accreditation	<ul style="list-style-type: none"><input checked="" type="checkbox"/> Accredited by the RACGP as Mental Health (MHST ongoing) – <i>formerly Level 1 ongoing</i><input checked="" type="checkbox"/> Cat 1 ALM (40 QA&CPD points) only when combined with a second BDI Mood Disorder Management Module workshop<input checked="" type="checkbox"/> May be undertaken as Cat 2 activity accruing 2 points per hour<input checked="" type="checkbox"/> ACRRM 7 points
Pre-requisites	Pre-disposing activity must be completed and submitted prior to the event
Program Aims	This module encourages GPs to utilise a team based approach to the management of patients with mood disorders. It provides GPs with an understanding of the roles of various mental health professionals, including psychiatrists, psychologists, mental health workers and social workers. The role of crisis teams and clinics are also explored, along with resources available to consumers (patients and their carers).
Learning Outcomes	By the completion of this Program, participants will be able to: <ul style="list-style-type: none"><input checked="" type="checkbox"/> Work as an effective care coordinator for patients presenting with mental health problems, ensuring appropriate ongoing confidentiality and follow up<input checked="" type="checkbox"/> Develop mental health care plans in collaboration with patients<input checked="" type="checkbox"/> Use other mental health professionals and resources appropriately<input checked="" type="checkbox"/> Communicate effectively with psychologists and other professionals<input checked="" type="checkbox"/> Recognise strategies psychologists use<input checked="" type="checkbox"/> Maintain an ongoing role in the care of patients.
Program Calendar	All dates for our training programs are posted on our website.
