

# Certificate Courses

## Sydney Neurostimulation Centre - SyNC

Transcranial Magnetic Stimulation (TMS)

Transcranial Direct Current Stimulation (tDCS)

Half-day TMS Masterclass

## Certificate Course in Transcranial Magnetic Stimulation (TMS)

### Course Overview

A 2-day course in Transcranial Magnetic Stimulation theory and practical techniques, including hands-on practice in administering TMS.

### Who should attend

This course is suitable for clinicians and researchers who want to better understand TMS and gain practical skills in administering TMS.

### About the instructors

The course will be taught by leading international experts in neurostimulation & mood disorders, Professor Colleen Loo and members of the Sydney Neurostimulation Centre

## Certificate Course on Transcranial Direct Current Stimulation (tDCS)

### Course Overview

A 1-day course on Transcranial Direct Current Stimulation (tDCS). Participants will learn the principles of tDCS, its effects in psychiatric disorders and have hands-on practice administering tDCS.

### Who should attend

Mental Health Nurses, Psychiatrists, Academic Researchers

## Half-day TMS Masterclass

### Course Overview

This new masterclass will cover:

- Updates on TMS treatment for psychiatric disorders
- Updates on TMS and cognition
- Discussion of complex cases

### Who should attend

This course is suitable for researchers, and clinicians who have attended the 2-day TMS Certificate Course, and are interested in further training on current and emerging treatments
